

LOFT

How to design interior in **LOFT** style?

The loft style also referred to as the industrial style, is one of the hottest trends in interior design. It favours minimalism, open spaces, and plenty of light. Raw materials such as brick, metal, glass and wood that warm the interior are predominant. Bright colours are often used, contrasting with black loft elements - so white and grey, which additionally give the interior the desired raw atmosphere, are the best option. The loft style can be found in both residential and public spaces, e.g. in offices or popular cafes and restaurants. The loft atmosphere can be easily implemented using details and decorations to any, even tiny interior.

Handles, furniture legs, or shelf supports can change the interior, giving it an industrial character.

Let us present functional accessories and the use thereof with other details.

FURNITURE LEG

ARTO

- › the perfect base for creating original tables and coffee tables
- › gives the interior a unique, industrial atmosphere
- › available with two or three rods and in three sizes
- › available with a soft stabilizing foot
- › easy assembly

A table leg is a design component used for both functional and decorative purposes. Arto legs are durable and distinguished by an aesthetic design. Arto is a perfect match with any space decorated in a loft style, but it also perfectly blends with Scandinavian minimalism or modern design, breaking the usual, well-known arrangements.

FRAME

INDUSTRIA

- › for the construction of tables in the kitchen, dining room, and living room
- › black matt gives the furniture a fashionable, industrial look
- › „a wide selection of designs allows for many interesting arrangements in any space - residential, office, or gastronomic”
- › for a stable seating of the table top
- › easy assembly - the frames fit perfectly into the DIY trend

The table is the heart of any home and a meeting place with family and friends. Industria frames for the construction of a dream custom table. An excellent support for a solid solid wood worktop. Each frame is covered with felt on the bottom, securing the base.

SHELF

SUPPORTS

- › design inspired by the latest interior design trends
- › 10 attractive designs
- › capacity from 15 up to 30kg
- › robust design
- › the supports create beautiful, modern arrangements with wooden shelves

In modern interiors, cabinets, shelves, or countertops are replaced by shelves. Supported on loft supports, they are a functional and decorative element of any interior. The place and method of use are limited to our creativity and needs only.

SLIDING SYSTEMS

LOFT SYSTEM

- › upper track system
- › load capacity: 100 kg/wing
- › for panels with a thickness of ≤ 46 mm
- › width of the lockable opening up to 900 mm
- › track length: 2 m

Designed in an industrial style, the Loft system is a line of furniture hardware for sliding doors with upper track system. These are systems intended for the design of doors between rooms, cabinets with suspended doors, and building in small recesses.

LOFT HANDLES

To create a coherent arrangement in an industrial style, it is necessary to pay attention to all the details, even those seemingly insignificant. Loft handles are especially important, as they emphasize this style and combine it into a single, harmonious whole.

Furniture handles can completely change the character of the interior, so it is worth replacing them to quickly, and inexpensively modernize the appearance of the interior on your own. With a fashionable handle, even an ordinary piece of furniture will look original. And the change will be visible at first glance.

UZ-819160-14
GZ-CENTO-1-14

Matte black, antique silver, and antique copper finishing make the handles fit perfectly into the loft style.
