

Bergamo series –
Elegance in brass

Bergamo series – Elegance in brass

The Bergamo brass series impresses with an elegant design that cleverly plays with different views. Starting from the handle neck with square base shape, the shape tapers off first and then ends in a flat, clearly accentuated handle. A thin light edge highlights the delicate appearance when viewed from the front, while the view from above or from the side reveals the full surface of the design.

With the **HOPPE Quick-Fit connection**, the handle sets can be fitted quickly, easily, and precisely and sit securely on the door without play. With **Secustik®**, window handles feature a locking mechanism to prevent unauthorised movement of the hardware from the outside, thus providing integrated basic security against break-ins. **VarioFit®** ensures patented stepless adjustment of the position of the spindle to the depth of the window profile. Handles for parallel slide/tilt doors and lift-slide doors round off the range.

A selection of attractive **contemporary colours** also makes the Bergamo series a perfect partner for different room effects. Dark handle finishes such as anthracite and black create effective accents in the room and can, for example, lend even more elegance to a tone-in-tone interior style. Copper and brass-coloured handles make a room look cosy and suit luxuriously designed rooms as well as Scandinavian-inspired living. The elegant matt chrome-plated finishes reinterpret the classic colour scheme of door and window handles.

The Bergamo brass series features **Resista®** and thus comes with a 10-year surface guarantee. The high-quality appearance is long-lasting, even with intensive use or in harsh climatic conditions.
