## Canberra series – Curved shape in brass

The Canberra brass series combines a straight edge on the top of the handle with a dynamically curved line underneath to create an attractive and harmonious overall impression. By combining it with either round or square roses, the angular or curved parts of the handle design can be visually enhanced in the interior door handle sets in this series.

The interior door handle sets in the series are equipped with the **HOPPE Quick-Fit connection** – and can be fitted quickly, easily, and precisely. With **Secustik®**, window handles feature a locking mechanism to prevent unauthorised moving of the hardware from the outside, thus providing integrated basic security against break-ins. **VarioFit®** ensures patented stepless adjustment of the position of the spindle to the depth of the window profile. Due to their curved shape, the window handles are only available in the right-hand version.

With a selection of five attractive **contemporary colours**, the Canberra brass series is also a perfect partner for different room effects. Dark handle finishes such as anthracite and black create effective accents in the room and can, for example, lend even more elegance to a tone-in-tone interior style. Copper and brass-coloured handles make a room look cosy and suit luxuriously designed rooms as well as Scandinavian-inspired living. The elegant matt chrome-plated finishes reinterpret the classic colour scheme of door and window handles.

The Canberra brass series features **Resista®** and thus comes with a 10-year surface guarantee. The high-quality appearance is long-lasting, even with intensive use or in harsh climatic conditions.
